

**NORTH LONDON WASTE AUTHORITY**  
**WASTE PREVENTION COMMUNITY FUND 2018-19**  
**ROUND 2 SEPTEMBER 2018**

**CLARIFICATION QUESTIONS AND NLWA RESPONSE**

(These questions may have been paraphrased in order to assist all potential applicants with understanding the Authority's requirements)

**CLARIFICATION QUESTION:** In the guidance document you say that "The total amount available for 2018-2019 is £25,000", but also that you will offer "up to 100% funding of the project cost, support can be provided for projects up to £15,000". Can you let me know any more information about your expectations for project costings funded through this round, and what you expect the average size of grants given out during this round to be?

**NLWA RESPONSE:** The total amount available for funding is £25,000 and organisations can apply for a maximum funding of £15,000 which can vary by project size and/or amount of funding. Organisations may apply for part or full funding for the project and it can be for either goods or for the cost of an activity or both, provided that the total cost of funding applied for does not exceed the maximum available funding amount of £15,000.
